

029 - More Washers on Campus

Proposer: Chelsey Grooby

Union Notes

- At full capacity, 700-800 students live on campus in all of the different halls of residence.
- There are only 9 washing machines to service this number of students.
- Students have frequently complained about having to wait and the washers not being maintained to a high standard as they are so frequently used.
- The washers aren't large enough to facilitate mixed washes of clothes and bedding causing students to use more than one at a time.

Union Believes

- Students should have access to laundry facilities on campus that reflect the number of students residing here
- We need more washers on campus to facilitate different types of washing e.g. bedding, towels, colours, whites/darks
- Within reason students should not be required to wait long periods of time to access a washer.

Union Resolves

- To mandate the President to speak with estates and facilities regarding Circuit Laundry Contract
- To lobby the University to invest in more washers (potential for new location)
- To meet with circuit and discuss implementation of new washers and also make sure that there are eco washes available (sustainability)
