

012 – Refreshments in the Trinity Building

Proposer: Emma Stevenson – Representative for ICE

Union Notes

1. There are currently no water coolers in the Trinity Building
2. There are no hot drink facilities in the Trinity Building
3. This means that when students are given breaks during teaching time, they are forced to run over to another building just to get a drink
4. Water Coolers encourage students to bring their own water bottles and thus help to reduce the volume of single-use plastics being used by students

Union Believes

1. Students who are often taught in the Trinity building should have access to the same facilities as students who work on other parts of campus
2. Having to run to other parts of campus means that a student cannot actually use their break to relax
3. The university should be doing all it can to discourage single-use plastics

Union Resolves

1. To implore the university to install a water cooler in the Trinity as soon as possible
2. To ask the university to explore the possibility of getting a hot drink machine in the Trinity Building
